

POOL VOLLEYBALL INSTRUCTIONS

Pool Volleyball

- Telescopic PVC Poles (2pc.)
- Pole Support Bases
- 3' x 24' Net
- 5' Adjuster Cords
- 2-10" Plastic stakes

Height Setting Above Pool Side

- 34" - 38" & 42"

Base & Pole Set-up

The support bases can be filled with water and/or sand. Position the bases on either side of the pool playing area. Insert lower pole section securely into the base. Adjust pole to desired playing height.

Net Assembly

Insert the rope cable through the net clip on the pole. Wrap top rope cable around the pole and through the grommet hole in the top corner of the net. Tie a double knot on the backside of the grommet to keep the rope from slipping. Tie the bottom net cords around the lower pole keeping the net sides parallel to the poles.

If additional net tension or outward stability is required, use the 15' adjuster cords and ground stakes. Do not over tension the poles. Keep the poles in a tight, upright position.

Note: net width can be adjusted to a shorter length by rolling excess netting onto the support pole.

Adult assembly and supervision is recommended.
